### **DETAILED ACTION**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-31 and 33-34 , drawn to a storage feature in a video distribution system with local interaction, classified in class 725, subclass 142.
- II. Claim 32, drawn to video distribution components, classified in class 725, subclass 151.
- III. Claims 36-40, drawn to indexing of data processing, classified in class 707, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as disk drives and related storage features in an interactive video distribution system. See MPEP § 806.05(d).
